

# AJEDREZ DE PAJARITAS

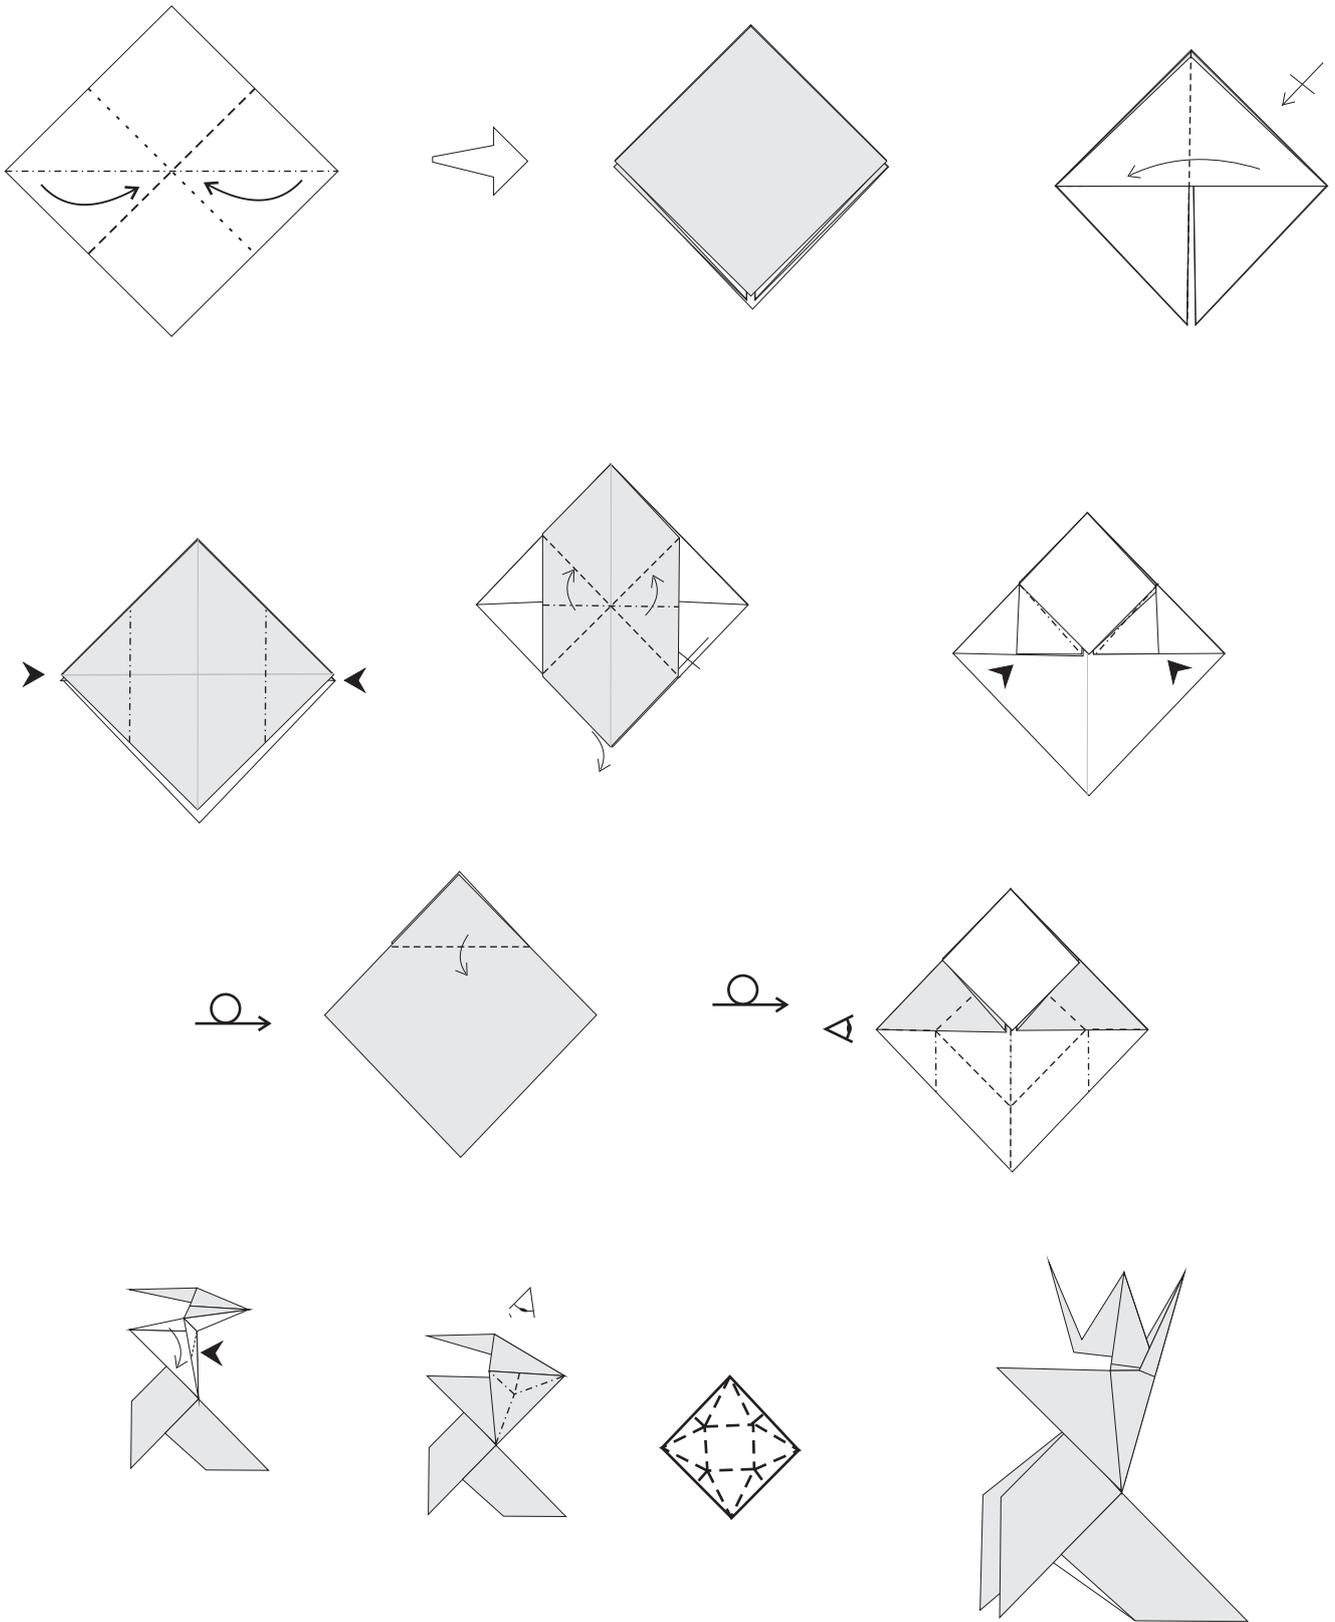

Para realizar este juego de Ajedrez necesitaremos 16 cuadrados negros y 16 blancos. Todas las piezas salen de cuadrados aunque lamentablemente no son todos iguales.

La proporción aconsejada es 2:4:5:6. es decir, si los peones (pajaritas normales) utilizan cuadrados de 5 cm los alfiles deberían ser de 10 cm, las torres y caballos de 12,5 cm y el rey y la dama de 15 cm

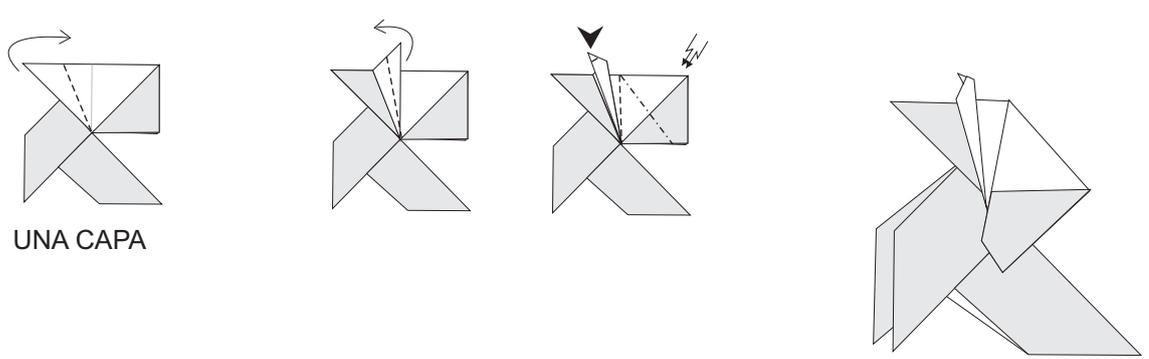

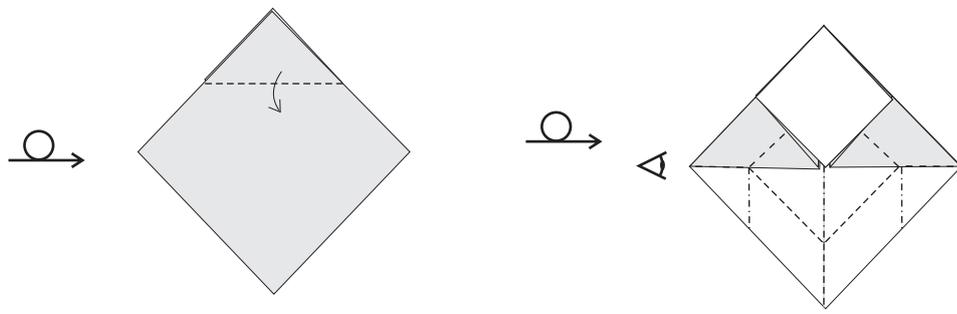

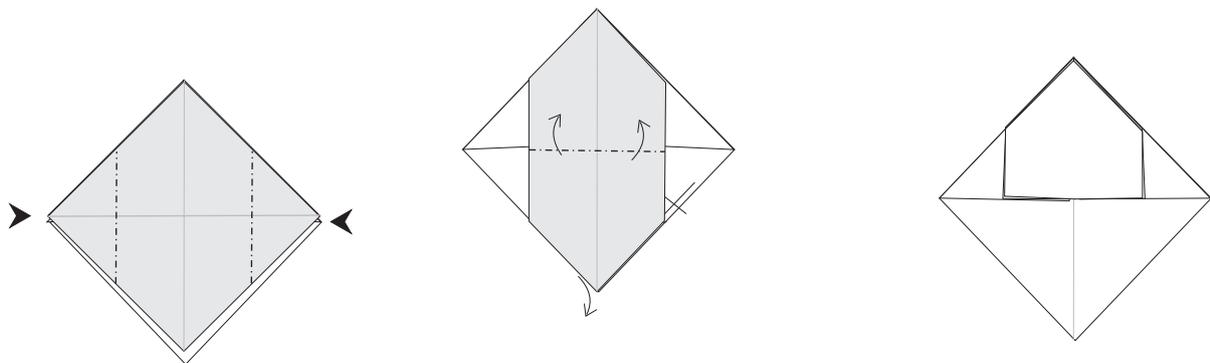

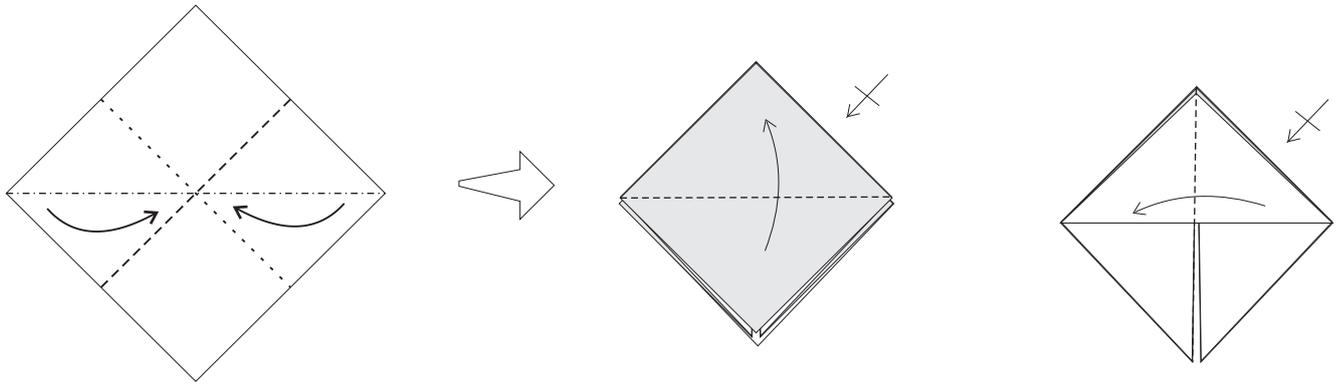

Dado que hay varios modelos es preferible usar papel de un sólo color por las dos caras

# REY

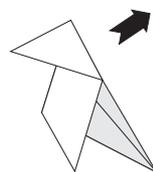

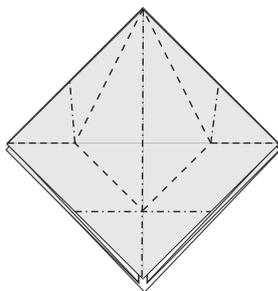

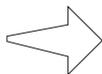

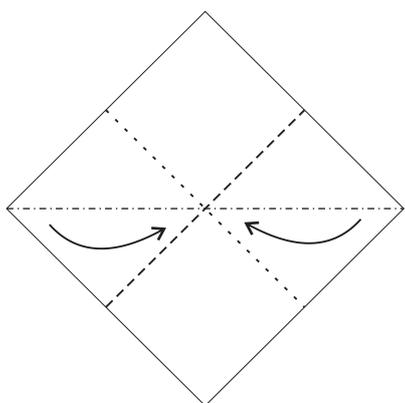

# DAMA (Pajarita Egipcia)

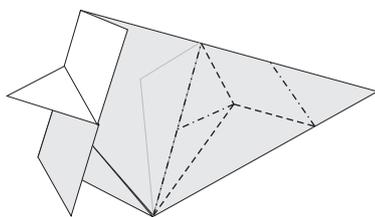

UNA CAPA

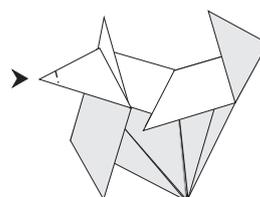

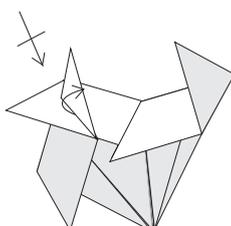

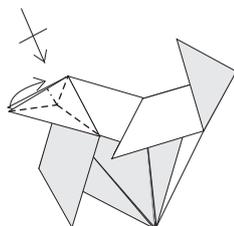

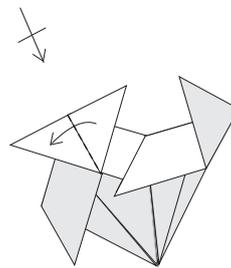

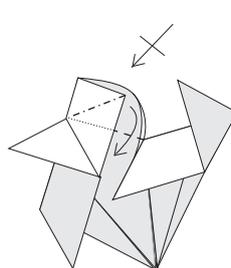

# CABALLO

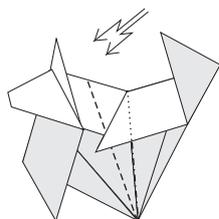

separar las capas

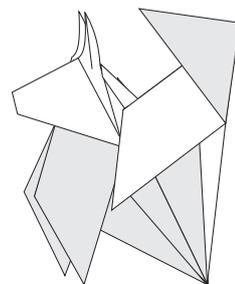

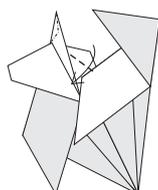

rehacer la "pajarita"

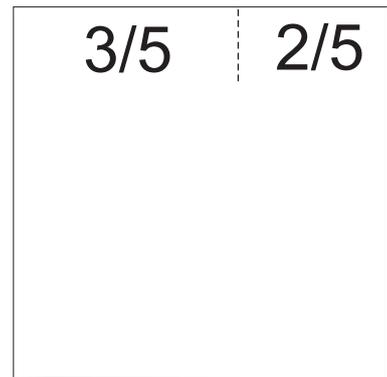

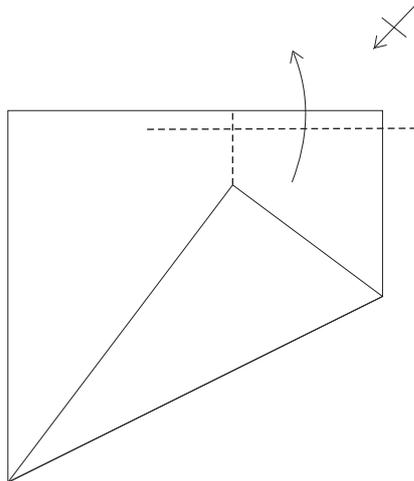

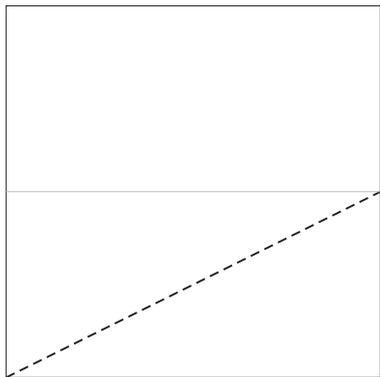

pasar una capa

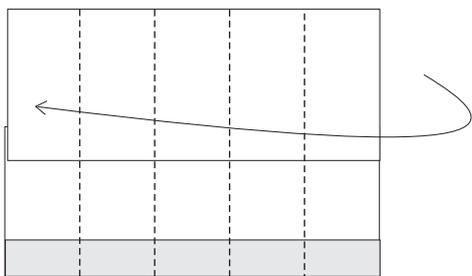

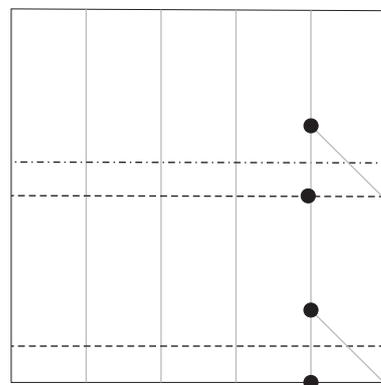

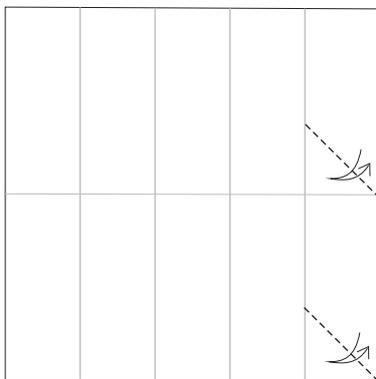

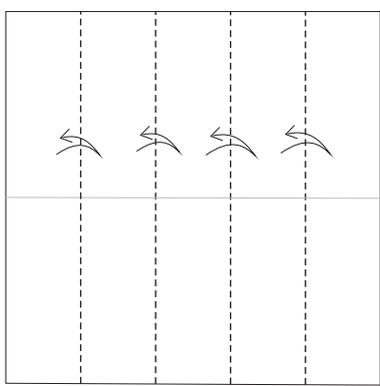

modelar las orejas  
y doblar las crines

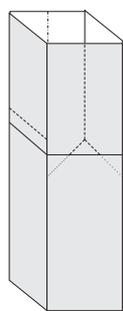

# TORRE

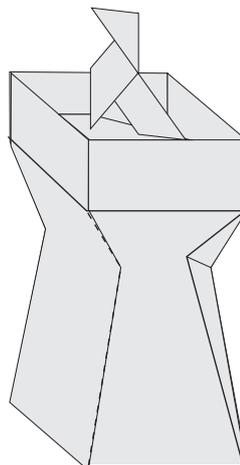

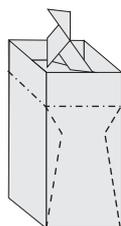

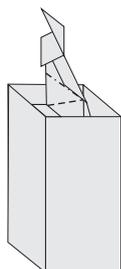

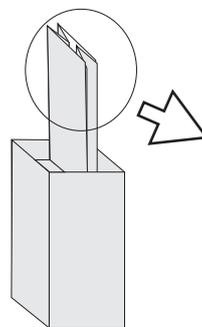

completar la división en 5

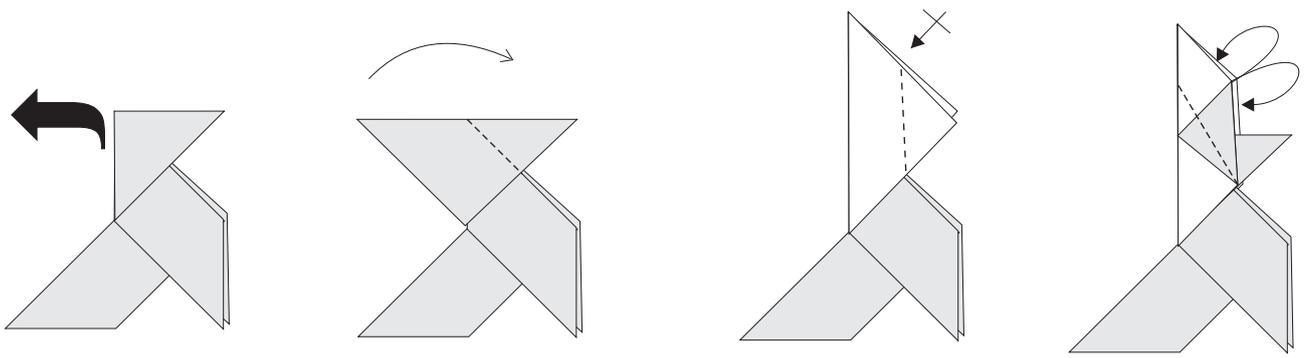

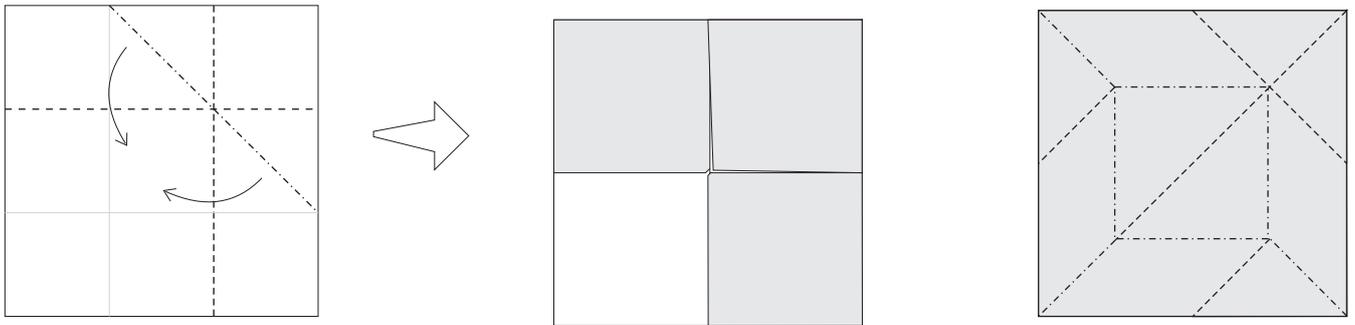

formar un prisma

aplastar

# ALFIL

sacar una capa
